

A distribution for (Drupal) User Groups

From concept to code sprint

Who am I?

About me

- Drupal developer since version 4.7
- projects
 - Sony Pictures Television
 - Da Vinci Learning
 - Intel
 - Saïd Business School - University of Oxford

Who am I?

Contributions

- Shield
- Multiform
- other modules and themes
- core patches to Drupal 7
- Drupal 8 Multilingual Initiative
- help and support
- member of the drupal.org and drupal.hu documentation team
- local DUG organizer

The Problem

- ➡ Szeged community is active
- ➡ interesting presentations
- ➡ lost on the internet
- ➡ place needed to collect and store materials
(presentations, demo files)

The Solution

We need a website!

What we need...

1. logo and branding
2. feature list
3. webdesign
4. development

Logo and branding

Existing DUG logos

Let's create our own logo!

- ➡ We should create a customizable logo!
- ➡ Anybody interested?
The Hungarian community said

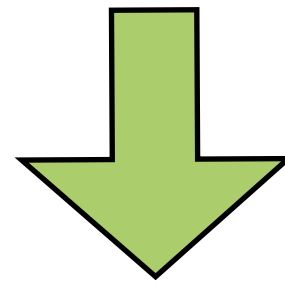

Customizable logo

Typo logo

CANCELLED

We miss
Druplicon :(

- Druplicon
- Opensource font for city
- Drupal colors
- Color, black and white, different sizes

The Drupal User Group logo

Share

- ➡ Share the whole theme!
- ➡ Even better: create a distribution!

Feature list

Drupal User Group

Issues for Drupal User Group

As an administrator, I would like to set up polls in different topics to identify the needs of my audience. updated	needs review	normal	tasks	Code	2 1 new	4 days 29 min	segi	5 weeks 3 days
As an administrator, I would like to set the Twitter hash used to identify tweets that should be displayed on the website updated	needs review	normal	tasks	Code	2 1 new	4 days 50 min	k.dani	5 weeks 3 days
As a registered user, I would like to mark my favourite programs and blogmarks to	needs review	normal	tasks	Code	2 1 new	4 days 17 hours	attila.fekete	5 weeks 3 days

For the community -
your opinion counts!

issue list: <http://drupal.org/project/issues/dug?categories=All>

Feature list

As an **administrator** I would like to

- set the language of the website during installation
- set the Google Analytics code during installation to measure site visits
- set the Twitter hash used to identify tweets that should be displayed on the website
- set up polls in different topics to identify the needs of my audience
- sync up events to our meetup.com page

Feature list

As a **registered user** I would like to

- share information about myself to let others know what I'm doing
- submit blogmarks to share interesting articles with others.
- mark my favourite programs and blogmarks to find them easily later
- submit presentations/programs
- send messages to other users to ask for help in different topics
- ask for email notification about events not to forget about them

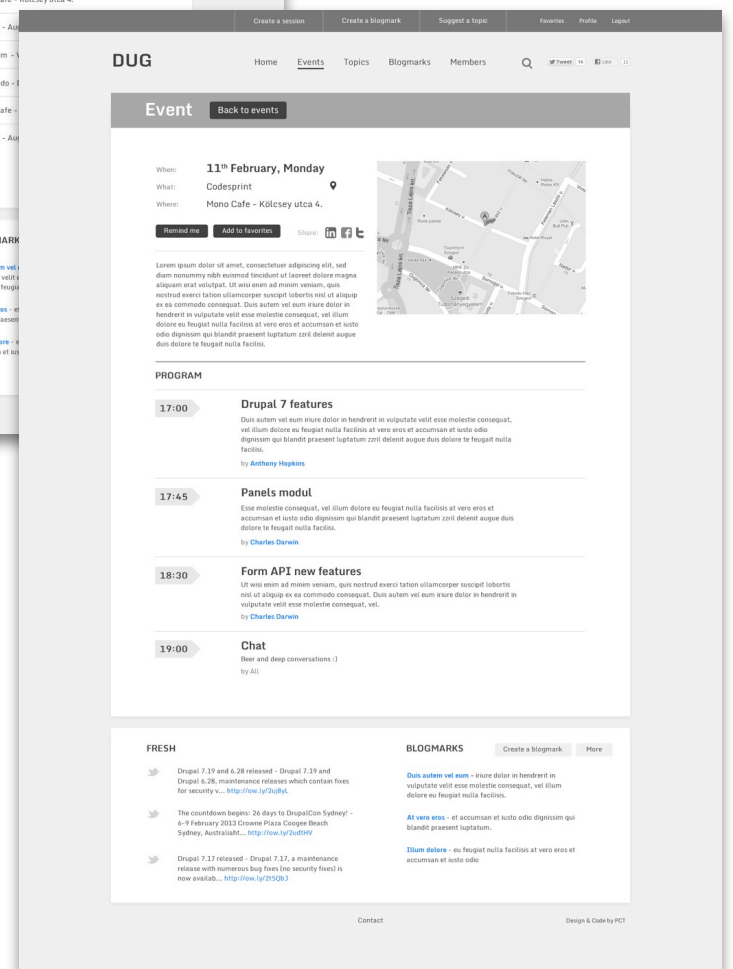

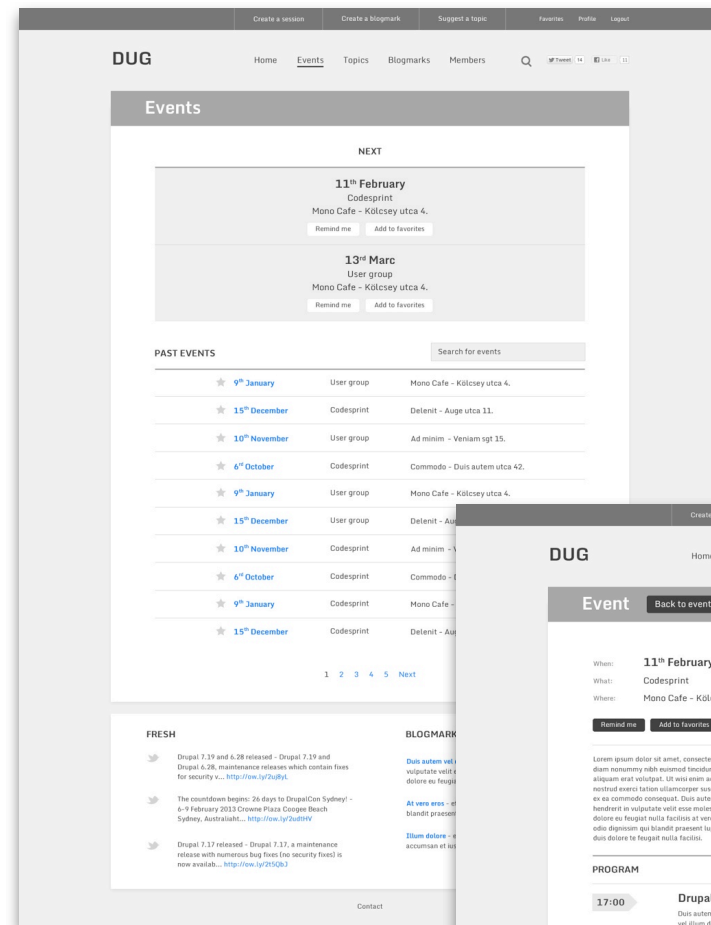

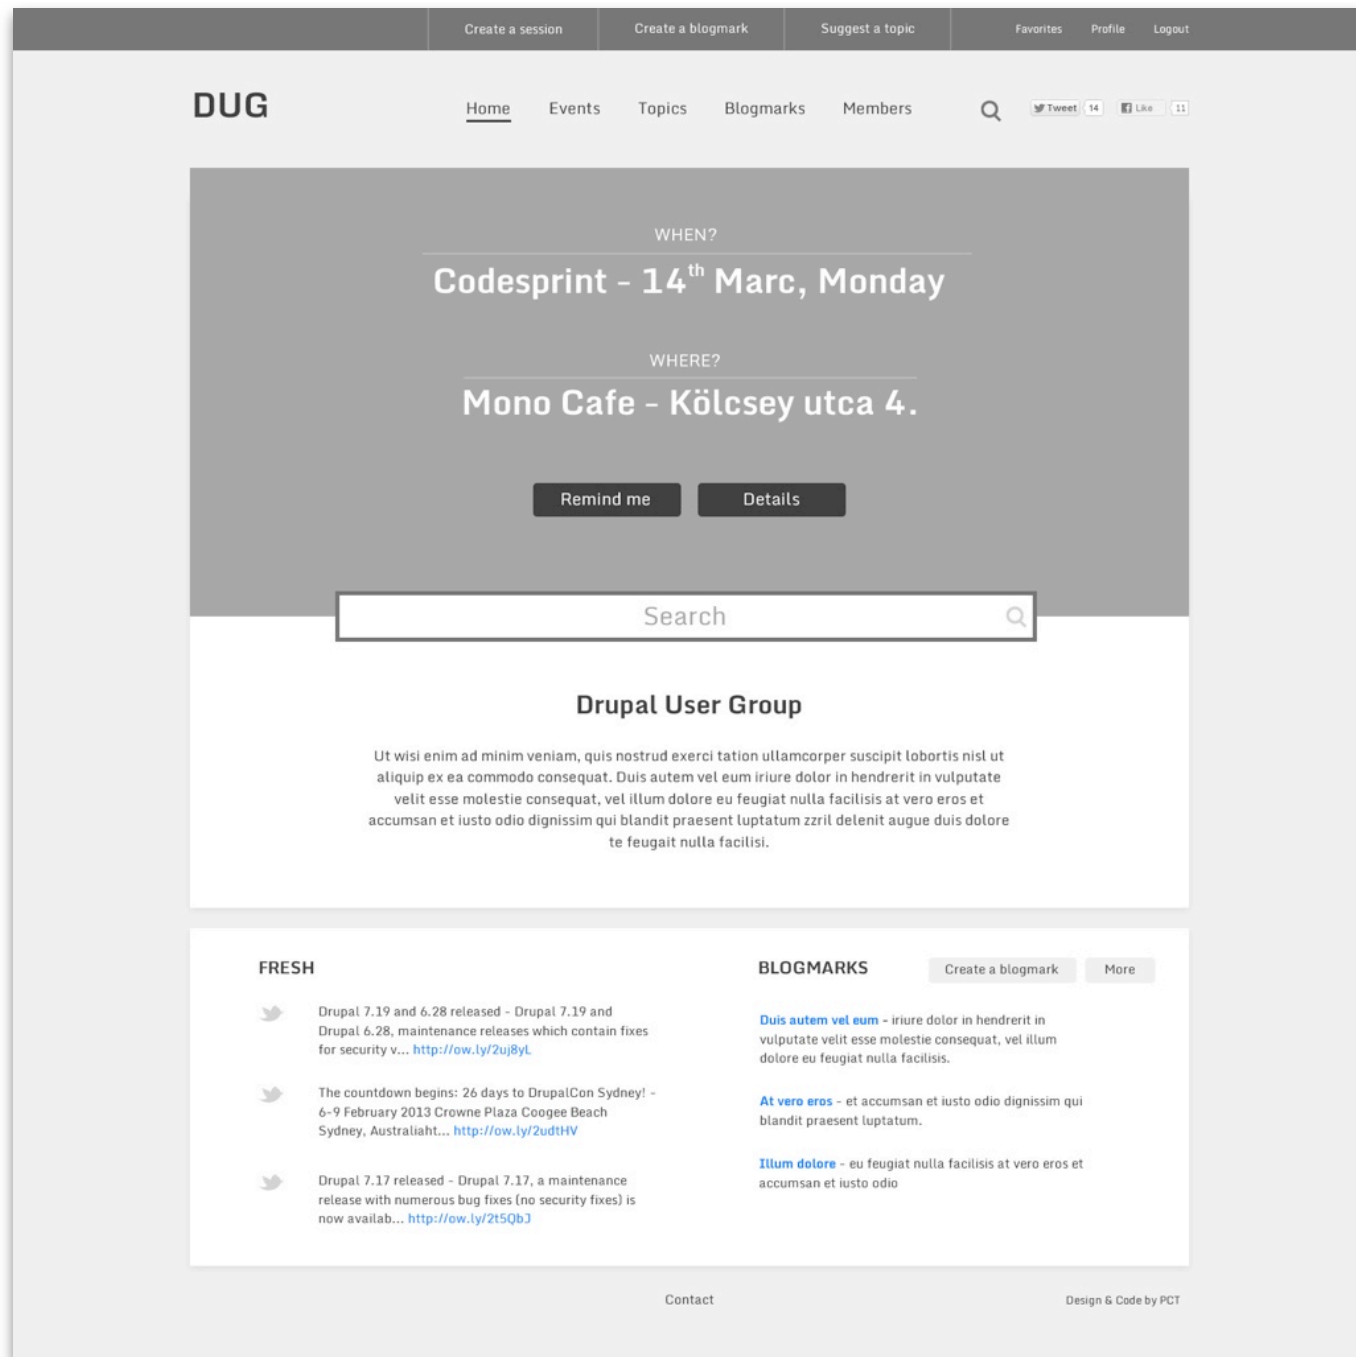

Feature list

As a **visitor** I would like to

- suggest topics to let administrators know what I would be interested in
- view past and future DUG events and code sprints, to plan attendance
- view previous programs
- share content on social media platforms to make interesting content more popular
- search and find relevant content later
- export events to import them into my calendar software
